Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

1. Claim 18 is objected to because of the following informalities: "...from and MPEG clocking to an internal network clocking of the second signal" should be read as "...from an MPEG clocking to an internal network clocking of the second signal" due to a typographical error. Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 16-25 (pre-amendment) are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 5,886,732.

Application claim 1 only differs from the Patent claim 1 since patent claim 1 further includes:

1) an internal network having a hub and a direct circuit crossbar (to provide network connection), which are further configurable to selectively provide a direct circuit connection between the set-top electronics and the network interface.

Regarding 1) above, application claim 16 is broader in this sense since it does not further include or define an internal network with a hub and a direct circuit crossbar (in the preamble statement) in order to selectively provide a direct network connection as further defined in the Patent claim 1. Allowance of claim 16 would result in a un-warrented time wise extension of the monopoly granted for the invention as defined by patent claim 1.

Application claim 21 only differs from the Patent claim 1 is that:

1) an internal network having a hub and a direct circuit crossbar (to provide network connection), which are further configurable to selectively provide a direct circuit connection between the set-top electronics and the network interface.

Regarding 1) above, application claim 21 is included this limitation in the claim body; however, this application claim 21 is broader in the sense that the arrangement between the set top electronics and the network interface as recited in this claim can be applied to a (any) general set-top electronics and any network interface unit instead of (exclusively) for use with an internal network having a hub and a direct circuit crossbar as defined in the Patent claim 1. Allowance of claim 21 would result in a un-warranted time wise extension of the monopoly granted for the invention as defined by patent claim 1.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Humpleman (US Patents 5,940,387 & 6,005,861) discloses a home multimedia network architecture.

Humpleman (US Patent 5,579,308) discloses crossbar/hub arrangement for a multimedia network.
